

# **150 Cable Tray Elbow Dimensions**

## Overview

---

Ladder Type Cable Tray Elbow (ORF) by Bahra Cables features 150mm height, 150mm width, and 2mm thickness. Made from pre galvanized steel, ideal for high heat cable installations in construction projects. UNITRAY LADDER TRAY is a structure consisting of two longitudinal side members connected by individual transverse members (rungs). In practice, cable tray dimensions are a system of interrelated measurements —width, depth, length, and material thickness—that directly affect cable fill compliance, heat dissipation, structural loading, and long-term expandability. Based on the reliable strength and quality of Unitrunk, UNIKLIP® Cable Tray System has been engineered with enhanced speed of installation and ease of use, to provide a commercial advantage with Klip perforations installation if requ 2015.
