

24-channel distribution box model and specifications

Overview

The FDB-T224C-24SC offers 24-core fiber management with IP55 protection for FTTH networks. It's made of high-quality engineering plastic, good in appearance and convenient boltless lock-structure, easy for installation. AZE's Outdoor Fiber Optic Distribution Box is applicable in FTTH project and suitable for building's outer walls application; They can distribute cables after installing splitters and also can draw out room fiber optic cables by direct or cross-connections. The MDB-M24 allows the connection, through patch panels or directly by splices, between the optical fibres feeding the MDU, and the optical fibres from the cables coming from the building network. 24 core SC / 48 core LC fiber distribution box for the last mile installation The Fiber Optic Distribution Box features a convenient flip-up design, facilitating effortless fiber management during installation. The individually installed splicing trays can be easily repositioned as necessary.
