

30kmolt optical module

Overview

The QSFP28 100GBASE-ER module is designed for data transmission using two single-mode (SM) fibers. It transmits data at speeds of up to 100 Gbps, over distances of up to 30 km. The module incorporates one channel optical signal, on 1310nm center wavelength, operating at 50Gbaud data rate. 100G 30KM transceiver QSFP28 SR4 fiber optical module 100G 30KM transceiver FEATURES APPLICATIONS STANDARD RoHS Compliant. Related products Fiber optic figure module adopts fiber optic as the transmission medium, fast transmission speed, strong stability, can meet the demand of large data transmission, not subject to the influence of electromagnetic interference, to prevent eavesdropping and eavesdropping, can support.
