

35 circuit distribution box

Overview

DB35 is a compact and versatile distribution block featuring 1 input connection for power and 6 output connections for efficient circuit distribution. Its main features are two-way opening and the use of wall bushings as connecting busbars. The 35kV European-style cable branching box is a critical device for 35kV network cable transitions, suitable for altitudes up to 2000m, ambient temperatures from -30°C to $+40^{\circ}\text{C}$, and daily average humidity $\leq 95\%$. Designed to support a wide range of industrial and control panel applications, it offers flexibility in installation with compatibility for both DIN.
