

# 4A1 Multimode Optical Cable

## 4A1 Multimode Optical Cable

---

### Comparing Multimode and Single-Mode Fiber Optic Cables

While both multimode and single-mode fiber optic cables use the same basic principles, each has features that make them suited for particular situations.

## **Multi-mode optical fiber**

Overview Applications Comparison with single-mode fiber Types Encircled flux External links

Multi-mode optical fiber is a type of optical fiber mostly used for communication over short distances, such as within a building or on a campus. Multi-mode links can be used for data rates up to 800 Gbit/s. Multi-mode fiber has a fairly large core diameter that enables multiple light modes to be propagated and limits the maximum length of a transmission link because of modal dispersion. The standard G.651.1 defines the mos
