

800mm deep optical cable fixing clamp for maintenance

Overview

The tension Clamp for fiber cable is designed to fix and keep the tensile state fiber. Usually, the fiber laying around the electric transmission line or laying on the building is resistant and wears less than 50m. In 2015, Jera line started to produce clamps and brackets for FTTX fiber optic cable deployment. The Clamp is used for dead-ending of 4mm to 6mm aerial round cables in FTTH architectures where spans should not exceed 70m (by 10 concatenated spans) and a maximum tension load of 1200 N.

800mm deep optical cable fixing clamp for maintenance

Optical Fiber Cable Clamp for Telecom Tower

Optical fiber cable clamp is designed to hold & fix 7mm cable and 21mm power. Each unit of plastic hanger has 3 holes, 2 holes for 7mm plus 1 hole for 21mm.
