

843r Optical Power Meter

Overview

The 843-R low cost power meter is capable of measuring power level from pJ and pW to thousands of Watts, in a compact body. 843-R has two display modes: a large digital display with a bar graph or with a high resolution simulated analog needle. The 843-R and 843-R-USB include a calibration certificate, a plastic case, 843-PS-UN, a convenient quick start guide and a 2. This manual tells you what you need to know to make full use of the 843-R for all your laser measurement needs. It is compatible Newport's 818, 918D, 819C/D series photodiode sensors or the new 919P series thermopile sensors.
