

90-degree right-angle bend in ground cable tray

Overview

How to 90 degree bend cable tray?

For a 90-degree bend, ensure the tray's internal radius meets the cable's minimum bend requirement. If fabricating, mark the side rail at intervals based on the calculated arc length, cut V-notches, and bend the tray until the gap. Great if you are new or just forgot how to do it, this easy to follow guide makes it so simple. Manufactured from hot dip galvanised steel, it provides excellent corrosion resistance, making it suitable for both internal and external applications.
