## **Users Manual Optical flow s**

After you connect all the board and accessories, please take the first flight at places with wide-open space, please refer to the instructions of APM2.52 or APM 2.6 to operate.

## **Driving an APM 2.8 Drone with Optical Flow**

Due to funding issues for the project (it is self-funded and is for a competition), we had to resort to buying an APM 2.8 FC. We're running ArduCopter on it, and it uses the MAVLink protocol
