

ASEAN Ten Countries Smart Patch Panel 4-core

Overview

It is used as a termination point for the drop cable to connect with patch cable in FTTH indoor application. At the core of any IT Service Management framework are processes for configuration, change, and incident management. MapIT G2 integrates the powerful combination of innovative Smart Patch Panels, user-friendly Master Control Panels and EagleEye™ software to provide real-time tracking and reporting of network-wide physical layer activity. This complete & intelligent-ready physical layer management system uses RFID technology for wireless detection of individual patch cords & real-time monitoring of unintended physical changes in network infrastructure.
