Aerial Optical Cable Pole

Overview

Aerial fibre optic cable is a fibre optic cable that is hung on a pole and is required to be able to adapt to various natural environments. Some are self-supporting, requiring no separate messenger wire between poles to support the cable's weight. [Already Know What You Are Looking For?](#)

Already have your cable in mind?

Visit all our outdoor cables [here](#). It is important when installing aerial optical fibre cable lengths to make proper arrangement for an adequate extra length of cable at a pole position for testing and jointing.

Aerial Optical Cable Pole

Aerial cables

Aerial cables are cables with integrated suspension wire of steel or all dielectric self supporting (ADSS) cables. Aerial installation is the most economical way of installation when existing pole lines can be
