

Affordable Smart Distribution Box Retrofit

Overview

The process involves simple steps such as mounting the Smart Power Distribution Unit vertically for optimal cable management, connecting sensors and interfaces, grounding the equipment, and configuring monitoring platforms. With our EcoFit switchgear modernization solutions, you can retrofit, replace, and recover your existing equipment without disrupting your electrical distribution network. The Romex® Brand SmartBox™ Original Device Boxes excel in versatility, especially in new work locations where hammer swinging is limited or where final wall surfaces are uncertain, such as kitchens and baths. The Lumin Smart electrical Panel transforms any standard electrical panel into an affordable smart panel capable of providing real-time energy consumption data and circuit-level control while boosting the performance of home microgrids through advanced load control and energy automation.
