

Are SC-sized pigtail refrigerants only available in this type

Overview

According to standard 34, the R-number of a chemical refrigerant is assigned systematically according to its molecular structure and has between two and four digits. If there are n carbon atoms, there are $n + 1$ digits in all: the number of these bonds is the first digit and the number of carbon atoms minus one ($n - 1$) is next.

Are SC-sized pigtail refrigerants only available in this type

Refrigerant Types 2026: Complete Guide to Classifications

Refrigerant choice depends on your system type, age, and local regulations. For new installations, choose A2L refrigerants (R-32 or R-454B) for
