

# **Austrian Island High-Density Fiber Distribution Box G 657A1**

## Overview

---

657A1 can provide the best transmission performance in the full range of 1260nm-1625nm, especially in the L-band long-wavelength window transmission, with excellent macro bending performance. This method is in accordance with the rounding method of ASTM Practice E29 (Standard Practice for using significant digits) ITU-T (International Telecommunication Union) defines several single-mode fiber standards, including G. Specifications are for product as supplied by Prysmian: any modification or alteration afterwards.

657A1 Fiber for Reliable Network Performance The 1x4 PLC Fiber Splitter, 100x80mm Plastic Box, 2.
