

Automated Production Line for Network Cabinets

Overview

The ring network cabinet production line is an automated, CNC - driven system for manufacturing electrical distribution cabinets. It follows a core process: precision cabinet body processing → core component assembly → full - performance testing → adaptive packaging & storage. Foshan Deli Machinery offers an Automated Server Rack Cabinet Production Line with Inline Laser Welding for efficient outdoor network cabinet manufacturing. Decoiling - Leveling - Pre-Punching - Roll Forming - Laser Welding - Hydraulic Sawing - Discharge - A specialized system for the mass. The EtherNet/IPTM In-cabinet Solution is designed to address these needs streamlining wiring, saving panel space, and making setup a breeze.

Automated Production Line for Network Cabinets

Cabinets Production

- Analyzerboard (cabinet) with connection methods such as ferrule, welding, thread, etc.
- Customization of piping and air source connection blocks to optimize space
