

# **Automatic drying function for distribution boxes**

## Overview

---

Automatic and robotic system designed for washing and drying thermal insulation containers used in distribution centers 2 and 5 degrees Celsius, with high humidity. Eureka Auto Box has sold millions of dry cabinet, dry boxes, electronic desiccators with excellent reputations from countless global users in various fields such as: EUREKA Dry Tech is the best moisture & humidity control solution on the market in preservations of all precious items in your living. The XDL-200 is a plug and play, fully auto-dry cabinet which will be stable at  $\leq 5\%RH$ . It is especially designed for moisture sensitive SMD packages to comply with J-STD-033B. With adsorption drying or nitrogen/compressed air flushing, constant humidity control below 3% r. JETBOXX® controls enable a perfect drying result by throughput and material-dependent dryer settings.
