

Auxiliary High Beam Module

Overview

Add-on module for the integration of a retrofit high beam to the vehicle-specific LED matrix headlights. The electronics read matrix and adaptive light signals directly from the CAN bus and deliver a. If not explicitly mentioned otherwise manufacturer of the goods is speedsignal GmbH, Carl-von-Ossietsky-Str. With modern headlights with LED or xenon technology, it is often difficult or impossible to pick up a control signal for the high beam. This auxiliary high beam allows you to drive safely on the highways, producing more light than your factory high beams while giving you the option of adding off road performance in the mix.
