

# **Bidi Optical Module Filter**

## Overview

---

The HighPower BiDi® is a bi-directional optical component designed for full duplex communication over a single fiber. BiDi transceiver, a compact optical transceiver with WDM (wavelength division multiplexing) technology and SFP multi-source protocol (MSA) compliance, allows fast data transmission using a single fiber optic for both sending and receiving signals, saving resources and cutting infrastructure costs. In practical network deployments, this makes BiDi SFP modules a highly effective solution for.
