

**ZTP Thermal & Power**

# **Bolivia Outdoor Temperature- Controlled Cabinet Immersion Liquid Cooling Installation Solution**

## Overview

---

The BESS Container 500kW 2MWh 40FT Energy Storage System Solution is a cutting-edge, highly integrated energy storage solution designed for large-scale applications. The Shenling SKY-AMECOL Data Center Cold Plate Liquid Cooling System uses a combination of onboard heat exchange and natural heat dissipation technologies. It transfers the heat generated by high heat-density components inside the server to the outside of the server chassis and then releases it. Immersion liquid cooling technology is a new cooling technology that uses liquid instead of air as the cooling medium. Compared with air, liquid has better heat transfer characteristics (greater specific heat.

## **Bolivia Outdoor Temperature-Controlled Cabinet Immersion Liquid C**
