

Bosnia and Herzegovina Anti-tracking Optical Cable G 655

Overview

The standard specifies the geometrical, mechanical, and transmission attributes of a single-mode optical fibre as well as its cable. 655 has the cable cut-off wavelength and cable attenuation coefficients in the C and L bands.

Bosnia and Herzegovina Anti-tracking Optical Cable G 655

Optical Fiber Types

The ITU administers the commonly referenced single-mode fiber standards documents, G.652 through G.655, as required by telecom systems manufacturers and their customers.

G.655

The standard specifies the geometrical, mechanical, and transmission attributes of a single-mode optical fibre as well as its cable. The range of mode field diameter permitted in G.655 is 8 to 11 μm in non-zero dispersion-shifted fibre (NZ-DSF). G.655.C fibre has a maximum PMD link design value of 0.20 ps/sqrtkm, which is the lowest value recommended by ITU-T. G.655 has the cable cut-off wavelength and cable attenuation coefficients in the C and L bands.
