

Butterfly-shaped optical cable fixing

Overview

It is specially designed for butterfly optical cable overhead wiring scenarios and is used to bind the suspension wire of self-supporting butterfly optical cables. Butterfly-shaped optical fiber cables are a popular type of fiber optic cable that is commonly used for data transmission in telecommunication networks. The name comes from the cross-section: a flat, wing-shaped profile with the optical fiber sitting in the center and two parallel strength members flanking it on either side. The invention belongs to the technical field of optical cables, and discloses a butterfly-shaped drop-in optical cable for communication, which has a fitting part (1), a plurality of protection bodies (2), a plurality of butterfly-shaped drop-in units (3), a protective layer (4), The outer sheath.

Butterfly-shaped optical cable fixing

What Are FTTH Butterfly Optic Cables and Why Are

FTTH Butterfly Optic Cables are revolutionizing the way we connect and communicate. With their high-speed data transmission capabilities, space
