

# **CAD cable tray style settings**

## Overview

---

To specify a cable tray pattern, under Cable Tray Pattern, select a type of line pattern, and enter a value for Spacing. To assist you, the preview image on the right provides an example of the current selections. The software automatically inserts a fitting when you connect one cable tray segment to another under Connect with Cable Tray. In the Construction height section, you determine the height at which objects are drawn by setting the storey, reference edge and, if necessary, an offset. This guide outlines a comprehensive approach to modeling cable trays efficiently within the software. A cable tray system is ideal for protecting and organizing electrical connections in commercial and industrial environments.
