

Cable routing frame installation and cable laying price

Overview

Professional network cabling in 2026 typically costs \$150-\$250 per commercial Cat6 drop, \$200-\$350+ per harder Cat6A commercial drop, and \$200-\$400 for isolated finished-wall additions where minimum service-call labor dominates. Ethernet cost ranges typically reflect three major inputs: cabling (Cat6/Cat6a), active network hardware, and professional installation. Network installation costs vary significantly, ranging from \$2,500 to \$6,000 or more, as there's no one-size-fits-all network cable installation pricing model. Cable tray installation cost per meter varies by specifications; GangLong Fiberglass offers kits for raised floor system and facility needs.
