

# **Cable tray bolts and nuts rust**

## Overview

---

The environment where the cable trays and their attachments will be located also call for bolts and nuts that resist rust. Stainless steel cable tray bolts and cable tray nuts are appropriate for use in conditions where there is exposure to moisture or corrosive elements. In this other picture is the bonding for the frame of the machine, this is tin plated copper terminal and copper cable over stainless steel. The M6 x 16mm cable tray bolt & flange nut set provides secure fastening support for cable trays and channel systems with minimal surface obstruction. Our cable tray bolts are zinc plated have a cross-slot head and come with serrated flange nuts.
