

Cable tray bracket quota

Overview

Cable tray support quantity can be calculated using a simple formula: $\text{Support Quantity} = \text{Total Length} \div \text{Support Spacing} + 1$ $20 \div 2 + 1 = 11$ supports In a typical project, a 20-meter cable tray with 2-meter spacing requires 11 supports. As the industry leader in cable tray, Eaton offers one of the widest ranges of B-Line series cable management solutions available in the market today. When developing our cable support OBO can offer reliable solutions for systems, three attributes are at the routing and fastening cables securely core of what we do: efficiency, resilience for each of these installation challenges and safety. All illustrations, descriptions and technical information included in this document are provided as indications and can cable trays are equivalent. We also play an important role as advisor and guide during the installation process.
