

Cable tray not displayed

Overview

The behavior occurs because the wireframe view does not apply depth testing, resulting in overlapping elements not being visually distinguished. Use the Hidden Line display style for a more accurate representation of multilayered cable trays. To Resolve cable tray not visible in dgn and nor can be found via selection tools in BRCM, this document explains way to find those hidden elements and delete it. User has modified their cable trays from 100mm height to 125mm, but when they generate report, they are still able to see some cable. It works well for familytypes like switches or powerplugs but not with system-familys like cabletrays or pipes.

Cable tray not displayed

Error: Revit reports that a cable tray fitting is not loaded

Solution: To solve this issue: Duplicate another cable tray type (do not duplicate the type that doesn't work, as any flaws in that type will also be duplicated); Rename it as needed, and add
