

Can indoor fiber optic cables be moved to a different location

Overview

If you call your internet provider they can extend the fiber cable and use the existing channels in the walls to route it wherever you want it to be. I'm thinking that instead I could just get a new 75 ft fiber cable, run it through the soffit into the attic, across. This process demands careful planning to maintain service continuity and optimal performance. Depending on your needs, would an ethernet cable not cover it?

to move a master socket if you have ADSL or FTTC is £130, to move an ONT if you have FTTP is around £98, it's the fee Openreach charge all providers for relocating. Can you pull the fiber back out to the exterior and then extend it down the length of your house then re-insert it maybe from below (crawl space) or your attic if you have one so it is inconspicuous?

dont have attic as I have some one living above me, how ever ill have a look to see if there is any. This DIY effort is undertaken to maximize performance, improve aesthetics, or relocate the Optical Network Terminal (ONT) to a.
