

# **Can wire mesh cable trays be used in factories**

## Overview

---

Wire mesh cable trays find applications in data centers, traditional offices, manufacturing plants, and oil or gas refineries. On the opposite end of the spectrum from traditional cable trays are wire mesh cable trays. The wire mesh cable trays are turning out to be one of the available in modern commercial buildings for electrical and communication cables. Welded wire mesh cable trays are open-grid support systems engineered from high-strength steel wires—Q235B carbon steel (mechanically equivalent to ASTM A36) or 304/316 stainless steel—precision-welded into 50×100mm (~2×4") or 100×200mm (~4×8") grids with >90% open area.

## Can wire mesh cable trays be used in factories
