

# **Charging Pile Safety Distribution Box**

## Overview

---

The charging pile grid-connected box is a key piece of equipment in electric vehicle charging facilities, used to safely and efficiently distribute grid power to charging piles while also providing protection, monitoring, and metering functions. This versatile distribution box is specifically engineered for EV charging applications, offering a robust solution for both indoor and outdoor installations. Goode Electric is an enterprise specializing in the production, manufacturing and sales of sheet metal parts such as stainless steel and iron distribution boxes and distribution cabinets. Our company has a history of more than 20 years and has accumulated rich experience in the sheet metal industry. Its core innovation lies in the integration of an electrical fire-proof current-limiting protector, which solves industry pain points such as delayed.

## Charging Pile Safety Distribution Box

---

### **Why do more and more charging pile projects specify the use of 304**

Electric vehicle charging piles are usually installed in outdoor parking lots, on the ground of residential areas, in highway service areas, and even in coastal regions. Their accompanying
