What is Busbar? Types, Advantages (2026 Updated Guide)

Busbar is a metal strip or rod, usually made of copper, brass or aluminum, used for grounding and conducting electricity. It is divided into flat busbar, hollow busbar and round busbar.

Design Guide for bus bars

A value of approximately 400 circular mils per ampere is a traditional basis for design of single conductors. Since bus bars are not round, circular mils must be
