

# **Columbia large-core optical fiber 24 cores**

## Overview

---

This advanced cable features 24 cores, allowing for a significant increase in data capacity and making it an ideal solution for data centers, enterprise networks, and telecommunications systems. Fiber optic cable is a cable containing one or multiple optical fibers that are used to transmit the signal. The optical fiber elements are typically individually coated with layers and contained in a protective tube suitable for the environment where the cable will be deployed. High-quality LC-LC single-mode (mono-mode) Loose Tube installation outdoor cable for laying in a tube above- or underground.

## **Large-core Fibers - multimode, single-mode, effective**

Large-core fibers are optical fibers with a relatively large fiber core. Depending on the

numerical aperture, such fibers can be single-mode or multimode.
