

Communication 72-terminal optical distribution module

Overview

AMPCOM 72-port ODF supports SC multimode fiber with pigtails and couplers, cold-rolled steel housing, and pull-out splice trays. Fiber Management Tray also called ODF Distribution Box, Integrated Splicing and Distribution ODF. It is mainly used for cable inlet, grounding and fixing and the splicing between the terminal end and pigtail. Featuring 72-core LC single-mode connectors housed in a sleek off-white enclosure, this distribution frame delivers reliable, high-speed fiber. ODF patch panels are designed to provide a high density 19" rack-mountable solution for next generation fiber networks, it is used as terminal equipment of fiber optical cable for fiber patching, fixation, splicing and management.
