

Company Network PoE Switches

Overview

Power-over-Ethernet (PoE) Switch is a type of network switch that has the ability to supply power to specific devices. Depending on the method, there are two main types of PoE switches: active PoE and passive PoE. An Ethernet cable has eight signal lines, four of which are used for data transmission and the other four for DC power supply.

Company Network PoE Switches

Global IT Products & Network Solutions Provider , Black Box

Black Box provides cutting-edge IT solutions and technology products to businesses worldwide, ensuring innovative and reliable services for global digital transformation.
