

# Configuring Huijue Switch Aggregation

## Mechanical drawing

## Configuring Huijue Switch Aggregation

---

### Demonstration of port aggregation configuration and troubleshooting

Demonstration of port aggregation configuration and troubleshooting of Huawei switch s5700Huawei port aggregation is divided into two types: manual Load Balancing eth-trunk link and LACP eth-trunk

## **Configuring Aggregation and Access Switches to Be Managed by the**

On a government office network, aggregation and access switches are deployed in great numbers. Therefore, during initial batch deployment of these switches, you are advised to import device and

[Read More](#)

## **Link Aggregation Configuration**

Configuring Link Aggregation in LACP Mode Link aggregation implements load balancing, increases interface bandwidth, and improves transmission reliability. Maintaining Link Aggregation This section

[Read More](#)

## **01-05 VLAN AGGREGATION CONFIGURATION**

VLAN aggregation introduces the concept of sub-VLANs and super-VLANs. A sub-VLAN is an independent broadcast domain that contains only physical interfaces, whereas a super-VLAN

[Read More](#)

## Support

Configuring Ethernet link aggregation About Ethernet link aggregation Ethernet link aggregation bundles multiple physical Ethernet links into one logical link (called an aggregate link). Link aggregation

## A Switch Connects to a Server Using Link Aggregation

When the server uses IEEE 802.3ad dynamic link aggregation, the access device must use the LACP mode. When a server needs to obtain the configuration file from the remote file server through a

## **Configuring Aggregation and Access Switches to Be Managed by the**

Aggregation and access devices downstream to the core layer can automatically go online through Zero Touch Provisioning (ZTP). This section describes three automatic deployment

[Read More](#)

## **Configuring Aggregation and Access Switches to Be Managed by the**

In such a scenario, if the Eth-Trunks between the core, aggregation, and access switches still need to be set up in auto-negotiation mode, you can perform the configuration as

## **A Switch Connecting to a Server Through Link Aggregation**

In Figure 3-16, two or more network adapters of the server are aggregated to form a network adapter group to improve server bandwidth and reliability. This grouping can implement load balancing and
