

Custom-made long-span bridges in Israel

Overview

Nahal Amud bridges are twin six span bridges with a total length of 338m. BIM Leaders LTD specializes in bridge design, utilizing innovative 3D systems that enhance project coordination and efficiency. Efficient construction and long-term serviceability make them essential infrastructure elements in both developed and developing nations. The combination of stunning engineering feats and unparalleled eye for design results in some of the most picturesque bridges that you can find in Israel. Some bridges are for pedestrians; others are for transportation; some are for stopping by and admiring nature; while others provide evidence of. Shikun & Binui Solel Boneh Infrastructure's precast concrete plant is one of Israel's largest and leading manufacturers of precast concrete elements for construction, infrastructure, bridges, and reinforced soil-retaining walls.
