

Dbt distribution box

Overview

BLIIOT DBT series 4 Port M12 dual-channel distribution box is used to gather NPN or PNP sensor signals from different devices in the field, integrating them into a multicore cable for connection from the sensor to the controller. Powered by the brand new Fusion engine, dbt makes data teams extraordinarily productive as they build data models—whether locally or in the cloud. Build data pipelines the way software engineers build apps: modular, tested, and version-controlled. Various versions of distribution boxes, a large selection of materials, voltage ranges, rated currents and IP protection types / protection classes for indoor and outdoor use, as well as a wide range of accessories and tools such as WAGO plug-in terminals, crimping tools, cable ties, wire end. Our expertise extends to three essential pillars: charging stations, electric vehicle charging and energy distribution. Private, public car parks, shopping centres and local authorities Innovative technology that meets all your.
