# **Disconnect the household electrical distribution box when leaving the house**

## Overview

---

To disconnect your utilities, first, contact your existing utility provider/s and let them know you're going to move house. Once your energy distributor has cut off your old property, you'll receive a final bill, as well as a request to check your meter. Should the required emergency disconnect for a single family dwelling be located 300' from the house where the Utility meter base is located?

Inspector says yes because all disconnects have to be grouped together. We would like to have a switch to turn off the power between the meter outside and the breaker box inside but it looks like there are several options.
