

Disconnect the metal cable tray

Overview

You also need temporary supports and devices to hold the cables safely during demolition. Using tools like a laser rangefinder or tape measure helps you get the precise location and length. The following pages address the 2014 National Electrical Code® requirements for cable tray systems as well as design. These rules shall be applied in the cabling engineering workflow for all subjects concerning or in relationship with cabling in the ITER facility.

Disconnect the metal cable tray

Cable Tray Manual: NEC Article 392 Guide

For installations where the cables exit the bottom of the cable tray and the system is subject to some degree of vibration, it is advisable to use B-Line Trough Drop-Out
