

Distribution box air supply and exhaust

Overview

These boxes are crafted from plated steel with acoustic insulation, reducing noise and enabling efficient air distribution. Equipped with dampers, they offer precise control of airflow, making them suitable for supply and exhaust applications. These distribution boxes have inside an insulation lining made from 9 mm thick rubber foam. Department of Energy, Building America Program, "Advanced Strategy Guideline: Air Distribution Basics and Duct Design" prepared by Arlan Burdick-IBACOS, Inc. Mould damage to homes and health: is an enthalpy heat recovery unit really the answer?

We create innovative ventilation equipment with heat recovery and reliable fire and smoke protection systems, that ensure comfort and safety in various applications.
