

ZTP Thermal & Power

Distribution box wire suspension

Powered by ZTP Thermal & Power

Overview

Suspension clamps support the ABC cable on intermediate poles without compressing the insulation. They are made from UV-resistant polymer or aluminum alloy, equipped with galvanized steel bolts and bushings. These accessories, including suspension clamps, anchoring clamps, service clamps, insulation piercing connectors, midspan joints, and low-voltage distribution boxes, ensure the mechanical stability. Our flexible distribution boxes enable reliable, decentralised signal transmission and power transmission up to protection class IP67 – wherever passive distribution boxes are required. Whether you are suspending wires, cables, pipes, cable trays, lighting, busbar systems, or supporting false ceilings, our practical WFS ready-to-install kits with easy-to-follow. Custom cable preparation manufacturer UK Wire and Cable Preparation produced in seconds using automatic high speed machinery.

Distribution box wire suspension

CATALOG Wiring ducts, floor boxes and trunking Easily allows for

The ABB Concept floor boxes offer safety and reliability. Each of the two sides of the floor box can accommodate up to 4 modular wiring units, making it possible to mount a differential
