

Does the switch have 8 ports with optical ports

Overview

The Fastcabling 8 Port Fiber Optic SFP switch features 8 * 1Gps SFP ports and 2 gigabit uplink RJ45 ports. It can be used as a central management for multipoints IP devices at different locations. Full Gigabit Ports: Eight gigabit auto-negotiation ports provide up to 16 Gbps switching capacity. 3af/at-compliant PoE+ ports easily connect and power fixed devices like IP cameras, access points, and IP phones via a single cable. Cost-effective acquisition, easy handling, and high performance are the strengths of this fiber switch. The switch is designed for FTTX applications, such as FTTN, FTTC, FTTB, FTTD, or FTTH.
