

# **Drop cable fusion splice pigtail model**

## Overview

---

Slim, yet rugged and extremely light, the Swift KF4 enables quick cable to cable, cable to pigtail and cable to splice-on connector installations in one kit. This kit includes 250um, 900um, loose-tube and FuseLite 2 handlers as well as precision cleaver and hard carrying case. This guide covers everything: what fiber optic pigtails are, how they differ from patch cords, which connector and polish type to specify, how to choose between mechanical and fusion splicing, and the real-world applications where pigtails are the right call. AFL's pigtail assemblies help eliminate labor-intensive field termination, yet guarantee reliable performance. Featuring a unified construction allowing for easy fiber identification and rapid installation, these assemblies are built to exceed all TIA and Telcordia requirements.
