

ZTP Thermal & Power

Dual Digital Display Fiber Optic Sensor Platform

Overview

Developed to provide world-class long-range detection, DF-G3 fiber amplifiers are advanced sensors featuring dual digital displays for use with plastic and glass fiber optic assemblies. Multi-function remote wire allows control of the LED, outputs, remote teach input, and. * With automatic light compensation technology, 4 channels anti-light interference, stable performance. This advanced series ensures simple set-up and p operate in close proximity to avoid interference thanks to a cross-talk algorithm. Terminal Block Module, Relay Module, Cable, LED Light, Sensor, Control Power Box Body, Push Button, Switch, and Auxiliary Equipment, Human Machine Interface, Frequency Converter, Servo Motor, Module, Reducer and Other Industrial Automation Control Products.

Dual Digital Display Fiber Optic Sensor Platform

DF-G1 General-Purpose Fiber Optic Amplifiers

Advanced sensors with dual digital displays for use with plastic and glass fiber optic assemblies. Achieves 10us response time with 5us repeatability. Provides leading long-range
