

Dual Fiber Optic Interface Router Setup

Overview

To set up your router for fiber internet quickly, connect the router to your fiber modem, access the router's settings via a web browser, and input the provided ISP credentials. However, setting up a fiber optic connection to your router can seem daunting if you're unfamiliar with the process. This ethernet will then go through a 1 Gbit/s switch, and route two ethernet cables to each floor. This method enables significantly faster speeds and greater stability compared to traditional copper-based connections. My router is capable of PPPOE as well as other connection options and I wonder how do I get the details to set it up?

Can you tell us the name of the manufacturer and the typename or partno. In this article, Axarfusion will guide you through the steps to achieve this configuration and ensure that both routers work in harmony to give you a seamless browsing experience.
