

Elevator-specific power distribution box 118

Overview

The utility model is suitable for the technical field of distribution boxes and provides an elevator distribution box, which comprises a box body, a power supply and a power supply control module, wherein the box body is provided with a plurality of power supply. Siemens Elevator Control Switch (ECS) is designed to interrupt incoming AC power upon receiving a signal from a Fire Alarm Control Panel (FACP) for both cable and hydraulic elevators. Eaton's simple and economical elevator control fusible disconnect switch is an all-in-one solution that meets NFPA, NEC and local building codes related to hydraulic elevator applications. Additionally, it includes a shunt trip disconnect, relays to receive FACP signal and monitor shunt trip. Our control stations and control boxes are designed to meet the needs of manufacturers and integrators worldwide, combining robustness, customisation and international compliance.
