

# **Emergency Handling Plan for Remote Power Supply**

## Overview

---

This Emergency Power Planner will guide you and your team through the basic steps of building a contingency plan. To fill in the details, consult with an established supplier of rental power equipment . Mitigating an outage requires planning ahead, making a business continuity and emergency response plan, gathering the resources, and knowing when to activate everything. But not to worry—here's what you need to do to make sure that your organization doesn't shut down when the grid does. Emergency Communication Hierarchy: Distributed teams need redundant communication methods because emergencies affect different team members differently. This document was developed by the Cybersecurity and Infrastructure Security Agency (CISA) working with the Resilient Power Working Group (RPWG) to provide resilient power best practices for critical facilities and sites (excluding electrical and natural gas utility companies).
