

ZTP Thermal & Power

Emitting power of a 60km optical module

可选配件

Emitting power of a 60km optical module

10G SFP+ 1550nm 60km Optical Transceiver GPP-55192-06C

All modules satisfy class I laser safety requirements. Digital diagnostics functions are available via a 2-wire serial interface, as specified in SFF-8472, which allows real-time access to device operating

Average Transmit Optical Power and Extinction Ratio

The average transmit optical power refers to the optical power output by the light source at the transmit end of the optical module under normal working conditions, which can be considered as

[Read More](#)

10G BIDI SFP+ 1270nm-TX/1330nm-RX 60km Transceiver , FS

When high, this output indicates the received optical power is below the worst- case receiver sensitivity (as defined by the standard in use). Low indicates normal operation.
