

Energy Internet Exhibition

Overview

The Energy Internet of Things (IoT) Exhibition is a core feature of ISH China & CIHE, spotlighting how connected sensors, meters, gateways, and platforms optimize energy generation, distribution, and use across HVAC, plumbing, and home comfort systems. The IEEE EI² has been successfully held for eight times so far in Beijing, Changsha, Wuhan, Taiyuan, Chengdu, Hangzhou, Shenyang, Jilin, etc. From the SolarPower Summit: startups, battery innovation and smart charging shaping Europe's energy transition. How European businesses use solar, batteries and EV fleets to manage volatile power prices and explore the future of perovskite solar. EI² focuses on innovative technologies and practical implementations around 2 EIs (EI² in abbreviation) — "Energy Internet" and "Energy System Integration", which can be interpreted as the fusion of energy systems with information technologies and artificial intelligence as well as the coupling of. All-Energy is the UK's leading renewable and low-carbon energy event, connecting technology innovators, policymakers, developers, and investors. To exchange the latest progress in theory, technology and application in the field of smart grids and energy internet in recent years and to show the latest achievements, 2026 6th International Conference on Smart Grid and Energy Internet (SGEI 2026) will be held during November 13-15, 2026 in.
