

Estonian power distribution box

Overview

Estonia power strips and PDU power distribution units for surface mount, rack mount and general purpose applications. Elering is responsible for the operation of the Estonian electricity system as a whole, ensuring that consumers are provided with electricity supply of the required quality at all times. Könnér & Söhnen® Distribution Boards provide reliable connection for up to 7 groups of devices with a maximum current of 32A. High-quality components guarantee a long service life and protection against overloads and short circuits.

Estonian power distribution box

Power Distribution System Main Distribution Panel

An industrial main distribution panel is the core of any power distribution system. It receives electrical power from the main source and distributes it to various sub
