

# Explosion-proof model of power distribution box for smart buildings in Myanmar

## Overview

---

This paper describes the design, development, and deployment of a smart distribution box enabled by the Internet of Things (IoT) with the goal of improving defect detection, power monitoring, and overall energy management in single-phase residential power applications. • Flameproof enclosure (Ex d IIB+H 2), which can be used as feed distribution equipment in control and distribution system (such as distribution box, switch box of main circuit, control box, terminal box or motor starting box etc. Supermec ATEX Junction Box & Enclosures are designed to satisfy most of our clients' requirements for CONTROL explosion-proof and flameproof enclosures. Explosion-proof lighting distribution boxes and cabinets come in a variety of models. For power distribution of lighting or power lines, electrical equipment on/off control; also as a central signal processing system and central control system.
